

A specialist division of the Bradbury Group, Bradbury Grilles and Cages offers a unique range of retractable security grilles and cages. With both Bradbury CX and Extendor grille brands, Bradbury Grilles and Cages are able to cater for all security requirements from the highest risk/highest security installations to practical everyday solutions for securing commercial premises and homes against intruders.

The first company to achieve LPS 1175 certification for a retractable grille, Bradbury Group is also the ONLY COMPANY WORLDWIDE to manufacture a retractable grille to LPS 1175 SR3. Grilles are available to LPS1175 SR 1, 2 and 3 with Security Cages available to LPS1175 SR 2 and 3. Other products include Optiguard Vandal Protection Screens and Anti-Burglar Bars.

Bradbury Grilles and Cages Division includes a large modern Grille manufacturing unit at the Bradbury Group production facility in Scunthorpe, North Lincolnshire. Every product is custom made to order, with a team of engineers on hand to provide bespoke solutions to complex problems. Bradbury's delivery fleet ensures quick damage free distribution nationwide.

RETRACTABLE SECURITY GRILLES

Provide an effective visual and physical deterrent against intruders. Offering visibility and ventilation retractable grilles do not impact the exterior of a building so planning permission is not usually required. When not in use a retractable grille neatly stacks back out of sight taking very little space.

Suitable for windows and doorways, retractable security grilles work well with burglar alarm systems and are manually operated making them a cost effective and maintenance free security solution.

BRADBURY GRILLES

- ▶ Choice of security levels and certification to meet requirements
- ▶ Only range to offer grilles rated to LPS 1175 SR 1, 2 and 3

BOMB BLAST MITIGATION*: In bomb blast mitigation tests the Eclipse and Vulcan grilles were successfully tested in conjunction with glass backed with anti-shatter security film used

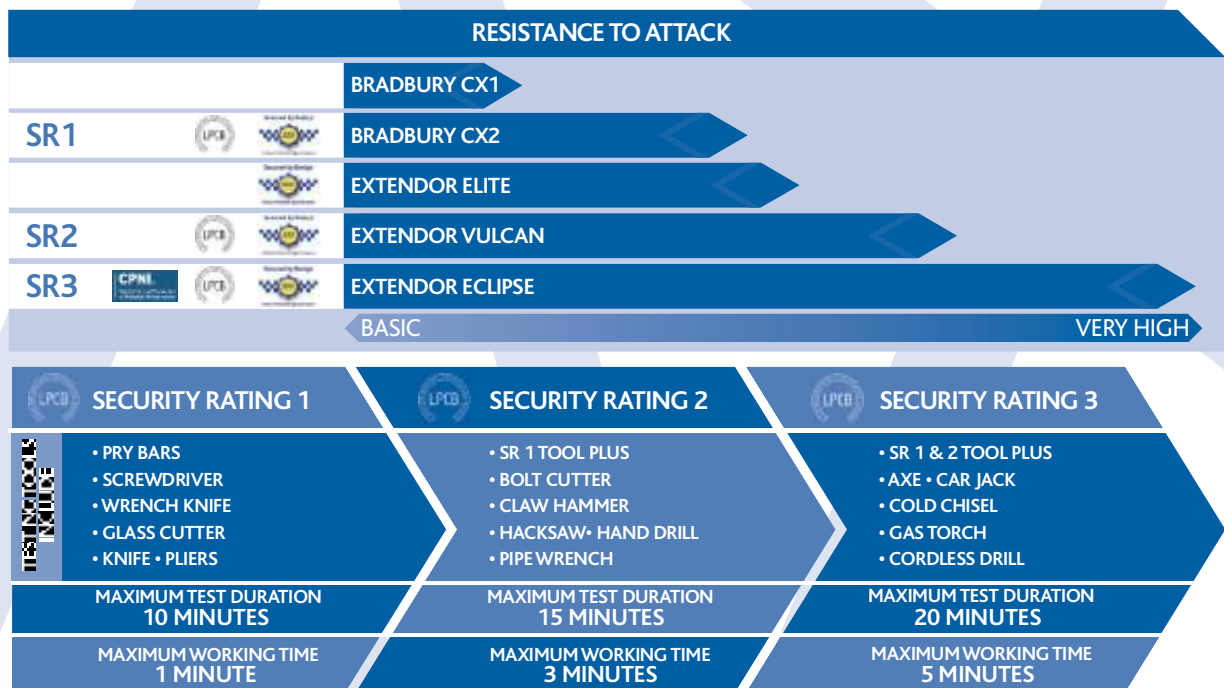

BOMB BLAST TESTING

- ▶ Grille mitigates the effects of bomb blasts on glazing treated with anti-shatter film
- ▶ Grilles remain fully functional after the blast and can be used as an emergency exit
- ▶ Grilles prevent looting after glass has been blown out
- ▶ Extendor Eclipse, Vulcan and Elite are the only retractable grilles to be successfully tested.

withstanding a 100kg charge at 20 metres. This is equivalent to ISO 16933:2007 - Glass in buildings code EXV20(E). This is classified as a low hazard rating for people inside the building.

EXTENDOR CAGES

Provide enhanced protection within a restricted or shared area. Access to an area can be controlled and monitored and lines of site facilitate CCTV coverage and patrol guarding. Extendor Cages also permit free airflow which means no additional climate control or fire detection and suppression are necessary.

- ▶ Cages are constructed on site from a modular system that can be added to or relocated in the future. No 'hot works' are required in assembly.
- ▶ Available in a range of security levels utilising the Elite, Vulcan and Eclipse grilles
- ▶ Vulcan and Eclipse cages are individually certified LPS1175 SR2 & SR3 respectively
- ▶ Custom designed to suit each location and application
- ▶ Certified for use with raised access floors
- ▶ British Government approved
- ▶ Almost unlimited size range
- ▶ Approved by the association of British Insurers

OPTIGUARD

A cost effective solution to vandalism, Optiguard is an unobtrusive perforated steel mesh fitted to the outside of windows to prevent glass being broken.

WINDOW BARS

20mm solid steel bars ideal for vulnerable premises and designed to rotate to prevent attack from intruders with tools such as hacksaws. The product is made without welding to reduce the risk of rust and is easy to install and maintenance free.
