Garage Doors With Impact...

THE IMPACT TEST DVD

We've all done it - misjudged our parking and nudged the garage door or had budding David Beckham use the garage door as a target for that curving free kick...

With most garage doors the result is a permanent reminder - an unsightly dent. With a GRP garage door the effect is more likely to be no effect at all! You can see for yourself with our new impact test DVD.

The test uses similar methods to the European standard impact test for double glazed units and easily demonstrates the unique resilience of a GRP garage door to every day knocks and bumps.

Such strength does not come at the expense of style - the high gloss white and woodgrain finishes are matchless for their good looks.

We don't suggest you choose our doors for football practice but we do recommend you get hold of a copy of the new DVD!
